Growth Automation Privacy Notice

Effective September 28, 2026. This notice describes how A.F.K. ONLINE LLC, doing business as Growth Automation, handles information submitted through thegrowthautomation.com and related consultation and service requests. It does not replace a client's own privacy notice for that client's customers.

Information we collect

When you complete the Growth Assessment form or book a consultation, we receive the details you provide, such as name, business name, email, optional phone number, website, business type, requested service, and your goals or challenges. Booking records may also contain appointment details. We receive basic site and device information through Wix and any site analytics or security tools that are enabled.

How we use information

We use the information to respond to inquiries, schedule consultations, prepare proposals, deliver services, maintain records, protect the site, and troubleshoot forms and automations. We send occasional marketing email only when the optional email preference is selected or another valid basis applies. The Growth Assessment form does not request consent for marketing text messages, and submitting it does not enroll you in marketing SMS.

Systems and service providers

Wix hosts the website, form, bookings, and contact record. We may use approved email, video meeting, and private automation providers to process an inquiry or provide a contracted service. An automation is used only after it is configured and activated. Providers receive the information needed for their task and operate under their own applicable terms. We do not publish form submissions or use them as public testimonials without permission.

Client customer information

When we work for a business client, that client controls the customer lists and business data it authorizes us to process. Our proposal identifies the systems and purpose of the work. We use that data to deliver the agreed service, restrict access to those who need it, and do not treat a client's customer list as our marketing list.

Storage, security, and retention

We use access controls and reasonable safeguards for accounts and automation systems. No online service can promise absolute security. We retain inquiry and service records for as long as reasonably needed to respond, fulfill agreements, maintain records, or meet legal obligations, then delete or de-identify them where practical. A client may request return or deletion of its data at the end of an engagement, subject to required records and platform capabilities.

Your choices and requests

You may unsubscribe from marketing email using its unsubscribe method or contact us. You may also ask to access, correct, or delete personal information we hold about you. We will verify and handle requests under applicable law. Cookie choices may be available through the site's consent controls or your browser.

Children and changes

The site and services are for businesses and are not directed to children. We may update this notice when our services or data practices change. The version posted with a new effective date will describe the current practices.
